## **Global Suppliers of Dry Bulk Material and Liquid Process Equipment Selects Colonial Seal as their Premier Supplier**

**Westville, NJ** - [Colonial Seal Company](http://www.colonialseal.com), the New Jersey based specialty distributor of [standard](#) and [custom sealing solutions](#) is pleased to announce that several businesses have utilized our custom PTFE seals in their bulk material and liquid processing equipment.

Customers chose PTFE seals supplied by Colonial Seal over competing offerings to increase equipment efficiency and reduce their procurement and inventory costs. The use of these Colonial Seal products highlights the company's ability to supply quality, cost effective, specialty sealing solutions to OEM's in demanding industries such as process feeders, supercritical chemical processing and pharmaceutical equipment manufacturing.

Sales Manager of Colonial Seal Company, Katrina Mackey, added "over the last year we have greatly expanded our specialty seals product offering into the pharmaceutical, chemical processing and food processing industries. We routinely supply seals in FDA and 3A Sanitary complaint materials such as Virgin PEEK, Modified Teflon, Silicone and Stainless Steel. This latest customer acquisition is one of the companies in the food processing industry that require seals for unique processing challenges meeting FDA compliance. Still another company, a recent new customer in the chemical processing industry uses our seals in an extremely hazardous environment. Both companies recognized the cost savings, improved efficiency and production time of working with Colonial Seal.
