

Colonial Seal Company

Is sealing in aggressive media, extreme temperatures, high pressures or dry running conditions a primary concern?

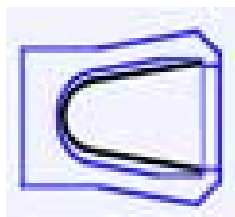

We provide a variety of PTFE sealing solutions for your application!

- Our [Metal-Cased High Pressure PTFE](#) seals are equivalent to Garlock PS-1 or Elring Klingner styles
 - Manufactured within days to reduce downtime
 - Excellent in chemical mixers, autoclaves and agitators
- We also supply [Energized U-Cup Seals](#) in Virgin PTFE, Glass-Moly filled PTFE and various other PTFE blends
 - V-Spring, Helical ribbon or angled coil metallic energizers in 302 SS, Hastelloy or Inconel
 - For use in cryogenic components, food dispensing and control valves
- Try one of our custom [Non-Metallic PTFE seals](#) with single acting or double acting sealing elements. Can be used as face seals or needle seals
 - Typical applications include high pressure cylinders, vacuum pumps and critical fluid separators

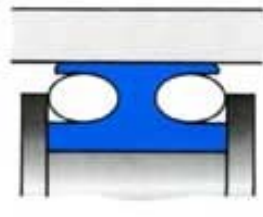

Call us at 800.564.2201 for a no obligation quote!
