## Quality Aftermarket Seals

Westville, NJ - [Colonial Seal Company](http://www.colonialseal.com), the New Jersey based specialty distributor of [standard](#) and [custom sealing solutions](#) offers an extensive product line of [rotary shaft seals](#), [hydraulic & pneumatic seals](#) and oil & grease seals for both static and dynamic applications.

“Colonial Seal Co. has full cross reference capabilities for most major seal manufacturers and specializes in replacements for obsolete or discontinued parts. We can offer our customers a cost effective alternative to name brand seals without compromising quality. In most cases, we can provide a 20% – 30% cost savings over Chicago Rawhide, SKF, Forsheda, NOK, National, Timken, Garlock, JM Clipper and other major brands. Additionally, our streamlined logistics processes, lower-cost tooling charges, and efficient production capabilities provide customers with alternatives in the event the large seal company OEMs are unable to meet your requirements.

Standard rotary shaft seal profiles supplied by Colonial Seal Co. are either metal cased or fully rubber covered. These profiles can either replicate existing designs, or Colonial Seal can recommend alternative designs, if standard profiles will not meet customer needs. The seals are available in many variations of standard materials such as Nitrile (NBR), Fluorocarbon (Viton®), Silicone (VMQ), EPDM, Polyacrylate, PTFE (Teflon®) in both standard and metric sizes.

Colonial Seal Co. also offers large bore fully metal-cased oil and grease seals. These metal-cased custom seals are produced with low or no minimum quantities, without tooling charges, in less than a week. These seals can tolerate shaft to bore misalignment of up to 0.026" depending on shaft speed and are excellent replacements for GARLOCK 64, GARLOCK P.S., Elring and GACO types. These custom metal-cased seals may be found in many industries including: food & beverage, oil & gas, pharmaceutical, heavy equipment, encoder, paper & pulp, steel, agricultural and mining.

Contact us at 1.800.564.2201 to request a quote on any seal requirements. If you have a unique application that requires a custom sealing solution, email us at [sales@colonialseal.com](mailto:sales@colonialseal.com), and we will contact you within 24 hours. Or, for more information on Colonial Seal Co. visit our website [www.colonialseal.com](http://www.colonialseal.com).
