

# Colonial Seal Inc.

**Looking for James Walker seals? We can produce replacement OEM seals usually faster and less expensive than the Walkersele**

## ***Colonial Seal Company Is The Solution!***

Colonial Seal Company can produce replacements for Walkersele rotary shaft seal profiles: D1, D5, D6 and D7 in NBR, Viton, HNBR or PTFE. These fabric/elastomer seals are available in single lip or double lip configurations. And can be either endless or split. Applications typically include hydropower, hydroelectric, and wind turbine, but are also found in steel and paper mills, conveyors, crushers, mixers, grinders and tunnel boring equipment.

James Walker replacements for their Lion Packings including:

- Lion Glandsele "S"
- Lion D/C Rings
- Lion Fabric Wipers Type "L"
- Lion Dish Cups
- Lion Flange Packings

James Walker "Shallex" Packings used in hydraulic presses, cylinders, valves or pipe line expansion joints.

Our knowledgeable staff and qualified network of global sourcing partners can save your company upwards of 30% annually. Looking for more savings? Talk to our friendly sales staff about your estimated annual usage, and let us show you how we can save you money while providing you with exemplary inventory management.
